

CRACK SEAL

1. PREPARATION

- a. Cover manholes, inlet boxes, and valves, as needed, to prevent oil and materials from getting inside the structures or system.
- b. Remove weeds from the road.
- c. Air-blast the cracks to remove sediments from the crack to allow for proper adhesion.
- d. Ensure that surface is clean and dry.

2. PROCESS

- a. Proper temperature of material should be maintained.
- b. Sufficient material is applied to form the specified configuration.

3. ACTIONS

- a. Use shovels and/or scrapers to remove excessive sealant application or spills and dispose of them properly.
- b. Sweep all loose debris from the pavement and dispose of it in the local landfill.

4. DOCUMENTATION

- a. Record location and date on the maintenance database and map.
